

Finding Patterns in 100s of Scientific Images

*...should **NOT** feel like searching for a needle in a haystack.*

InViTAG — AI-Assisted Exploration & Grouping of Scientific Images

Challenge. A Needle in a Haystack

Cell Biology

Thousands of microscopy images

Which cells show abnormal morphology?

Materials Science

Hundreds of microstructure scans

Where are the defect patterns?

Medical Pathology

Xray, CT scan, slide collections

Can you spot the rare disease markers?

Astronomy & Climate

Satellite imagery, historical records...

Which regions show emerging trends?

Every domain. Same problem. Hundreds of images. Hidden patterns. Not enough time.

InViTAG. You Lead, AI Scales

1

Explore

Skim through hundreds of images at a glance. Visual overviews help you spot initial patterns quickly.

2

Seed Groups

Drag and drop to create seed groups. Your expert eye decides what matters.

3

AI Scales Up

AI suggests groups for the remaining images. Review, validate, or refine at any time.

Full control. No black box. Your expertise drives the grouping — AI just does the heavy lifting.

Ready to Discover Hidden Patterns?

Any Domain

Biology, materials, medical, astronomy — if you have images, InViTAG works

Human-in-the-Loop

You stay in control. AI amplifies your expertise, never replaces it

Scale Effortlessly

From 10 seed groups to 1,000 classified images in minutes

Try InViTAG — explore your images like never before
